

Heavy Duty Protective Case

ProCase

EXQUISITE CRAFTSMANSHIP

- 360°Rotation
- Built-in Kickstand
- 3 Layers Protection
- Multiple Viewing Angles
- High Quality Genuine Leather Strap

FEATURES

Secure Fit

The thermoplastic hardshell body and elastic TPU has been designed to provide maximum protection for your iPad. The snug fit ensures that all the ports and buttons remain accessible at all times.

Leather Strap

The leather strap has been designed to provide maximum comfort regardless of hand size.

Rotation

The integrated rotation mechanism allows you to rotate your iPad.

Built-in Kickstand

The arm stand at the back of the case allows you to place your iPad on a flat surface in either landscape or portrait orientation.

STEP 1

Remove the external TPU sleeve by peeling it away from the internal hard case.

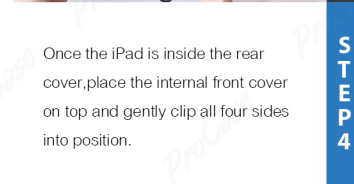

STEP 2

Remove the PC outer shell form corners to sides. Then cases are divided into 3 parts.

STEP 3

Insert the iPad into the rear cover.

STEP 4

Once the iPad is inside the rear cover, place the internal front cover on top and gently clip all four sides into position.

STEP 5

Reinstall the external TPU rubber sleeve.

Installing and adjusting the leather strap

❶ Open the flap covers on the back of the case. Begin by securing the holes on the leather strap onto the pins in the case on one side. Adjust the strap length so that it suits your hand size.

❷ Once the length of the strand is perfect, secure the holes on the leather strap onto the pins in the case on the other side. When it is finished, close the flap covers.

Using the stand

- ❶ The stand is located under the leather strap, gently lift it out using the finger latch.
- ❷ Once the stand is fully extended, place the case onto a flat surface.
