- Seamless

TRIO Core | P/N PF-WMS42SW

The ultimate All-in-One presentation switcher with universal BYOD. Besides providing wired connections with HDMI, VGA and USB-C interfaces, it also supports wireless casting by Airplay Mirroring, Miracast natively from mobile devices, and dongles are optional to allow a more reliable wireless connecting experience from laptops. With the built-in KVM and multi-view function, dual-way matrix output and seamless switching capability, the TRIO Core meets all your needs in meeting space.

Universal BYOD

The TRIO Core supports BYOD function, which includes wireless access and multi-format physical input. The participants can join in the meeting with almost any kind of devices they used to, such as tablets, smartphone and laptops. It makes meeting more convenient and efficient.

Work with UCC system

The TRIO Core is designed to cooperate with unified communications and collaboration system seamlessly. When partnering with Pixelfly TRIO UCC or Zoom Room, the TRIO Core can easily handle a perfect remote video conference.

Dual Output & Matrix Switching

The TRIO Core provides 2 HDMI outputs with follow and matrix switching modes optional, which allows you to deploy 2 screens in a meeting room and display separate contents.

Multi-View

You can manage and share multiple sources in a single display with a simple tap, easily achieved by TRIO Core's Multi-view processing technology, such as referring to document while having video conference or or solution comparison.

Seamless Switching

Pixelfly attaches native seamless switching ability on TRIO Core so that you can fulfill switching in a millisecond among different presentation devices, without any black or delay.

OSD-GUI Control

The integrated OSD function allow you to manage all the connecting sources and displays by simple click on screen, saving the cost without additional control devices.
