Using **+** and **-**, select the desired minutes. Press **OK** to save settings, or wait about 3 seconds and the programmed time will be automatically saved.

Step 6. Press **ON** to setup light's start-working time, the hour will flash. Using **+** and **-**, select the desired start-working hour. Press **⏪** or **⏩** to save the hour and activate the minutes. Using **+** and **-**, select the desired minutes. Press **OK** to save settings, or wait about 3 seconds and the programmed time will be automatically saved.

Step 7. Press **OFF**, repeat step 6 to setup light's off-working time.

Step 8. Press **PREVIEW** to confirm that the system has saved the desired start-working and off-working time.

Note: Timer controls both channels on/off together. Cannot turn VEG and BLOOM channel on/off separately.

Using Suggestions

The following section will help guide you in the process of evaluating the best methods for each stage of plant growth. Like many other growers, you can use this light throughout the seeding and flowering stages of your plants life. Remember to properly adjust the height and brightness of your light according to your plants desired level for optimal growth.

| TC900 | Height (above plants' canopy) | Using Hours | Brightness (VEG/BLOOM) |
|-----------------------------|-------------------------------|----------------|------------------------|
| 3-5 days acclimation period | 44" - 48" | 10 on / 14 off | 40 / 15 |
| Seedlings/ Young vegetative | 40" - 44" | 12 on / 12 off | 60 / 30 |
| Vegetative Stage | 32" - 40" | 18 on / 6 off | 100 / 60 |
| Flowering Stage | 24" - 28" | 12 on / 12 off | 100 / 100 |

Adjust the height and brightness accordingly to desired coverage and how well each individual plants responds as the brightness increases. The key is to always observe your plants and listen to what they're telling you. If the leaves are pointing hard towards the light, they love it! Give them more! If they shy away or appear limp and unhappy, while all other components and environmental variables are correct, back off with the light! They'll let you know very quickly how they feel. This is of course... the key to horticulture in general.

Setting system with Control Knob

Digital Display OVERVIEW

Main menus:

CH1 : VEG channel

CH2 : BLOOM channel
